

B.V. Kasun Vishvajith Vithanage

BSc (Hons) Data Science | University of Colombo, Faculty of Science

+94 753 140 204 | kasunvishvajithofficial@gmail.com | [kasun-vishvajith](https://www.linkedin.com/in/kasun-vishvajith) | [Kasun-Vishvajith](https://github.com/Kasun-Vishvajith) | [Portfolio](#)

PROFESSIONAL SUMMARY

Final Year BSc Data Science student at the University of Colombo with hands-on experience in machine learning, statistical modelling, and data dashboards. Work experience in a banking environment combined with elected student leadership roles demonstrate strong communication and teamwork alongside technical ability. Seeking an internship or graduate role in Data Science or Machine Learning Engineering.

TECHNICAL SKILLS

Languages: Python, R, SQL

Data Analysis & Preprocessing: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Advanced Data Analysis

Machine Learning & Deep Learning: Regression, Classification, Time Series Forecasting

Business Intelligence: Power BI, Tableau

Databases: MySQL, MongoDB (basic)

Tools & Platforms: Git/GitHub, Jupyter Notebook, VS Code, RStudio, Minitab, SPSS

Web Development (Basic): HTML, CSS, JavaScript

PROJECTS

Diamond Intel | *Python, CatBoost* | Group Project

- Solved the gemstone valuation problem where highly nonlinear relationships make pricing complex and unstable.
- Trained a CatBoost regression model using log transformed diamond prices and physical attributes (carat, cut, colour, clarity, dimensions).
- Built a web application that outputs statistically bounded price ranges with 90% and 95% confidence intervals using a two-tier model system.
- Gained insight into how log transformation stabilizes skewed targets and improves model generalization in regression tasks.

EV Range Analysis and EDA | *R, Multiple Linear Regression, Logistic Regression* | Group Project

- Conducted exploratory and predictive analysis on a 478 observation electric vehicle dataset to understand factors influencing driving range.
- Performed extensive EDA using scatter plots, box plots, and categorical comparisons across EV segment, drivetrain, and physical specifications.
- Built forward selection multiple linear regression achieving an Adjusted R^2 of 0.952 for range prediction.
- Developed a logistic regression model achieving 95.8% accuracy in classifying EVs into short range and long range categories.
- Identified key patterns such as larger and wider vehicles being associated with higher range, while taller vehicles tend to show reduced range.
- Learned how EDA complements regression by revealing relationships not fully captured by model coefficients alone.

Tea Yield Forecasting | *Python, SARIMAX, CatBoost* | Group Project

- Forecasted Sri Lankan tea production across 21 combinations of tea types and elevation levels.
- Developed a SARIMAX model to capture overall seasonal production trends.
- Built separate CatBoost models for each tea type and elevation combination using environmental variables (rainfall, temperature, humidity).
- Generated category specific forecasts that reflect environmental and elevation driven variability in production.
- Learned how decomposing a multi output forecasting problem improves interpretability and model performance.

EDUCATION

BSc (Hons) in Data Science | University of Colombo, Faculty of Science 2023 – Present (Final Year)

- GPA: **3.82 / 4.00**
- Relevant modules: Machine Learning, Deep Learning, Multivariate Analysis, Statistical Inference, Time Series Analysis, Causal Inference, Data Structures & Algorithms, Database Management, Optimisation, Big Data Analytics, Natural Language Processing.

G.C.E. Advanced Level | Ananda College, Colombo 10 2021

- Physics – **A** | Chemistry – **B** | Combined Mathematics – **C**

G.C.E. Ordinary Level | Ananda College, Colombo 10 2018

- **8 A passes** and 1 C pass across 9 subjects.

WORK EXPERIENCE

Customer Call Operator, Recoveries Division | Commercial Bank of Ceylon PLC, Head Office Feb 2023 – May 2023

- Contacted customers whose loan accounts were at risk of legal action or asset auction, communicating recovery terms clearly and professionally.
- Maintained accurate records of call outcomes and escalations within internal banking systems.
- Developed professional communication skills in a regulated, high stakes financial services environment.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

IT Director | Rotaract Club, University of Colombo, Faculty of Science 2024 – 2025

- Managed the club's digital operations, including social media infrastructure, content planning, and online engagement strategies.
- Coordinated a team of IT volunteers responsible for creating promotional videos, posters, and event-related digital content.
- Provided technical and creative support for Rotaract events, ensuring smooth execution of digital media and event technology needs.

First Year Coordinator | Faculty of Science Student Union, University of Colombo 2025 – 2026

- Elected representative for first-year students in the Faculty of Science Student Union.
- Acted as a liaison between first-year students and the union board, communicating academic, welfare, and administrative concerns.

First Year Representative | Physics Society, University of Colombo 2023 – 2024

- Represented first-year students within the Physics Society, encouraging participation in academic workshops and seminars.
- Supported event coordination and helped increase engagement in society activities among junior students.

IT Team Member | Stat Circle, Department of Statistics, University of Colombo 2023 – 2024

- Contributed to the creation of promotional content including posters, videos, and event highlight reels for departmental activities.
- Assisted in digital media production and branding for Statistics Department events and initiatives.
